

Description

In November 1987, San Diego County voters approved the enactment of the initial San Diego Transportation Improvement Program (TransNet) that resulted in a one-half cent increase to the local sales tax. TransNet's efforts have been largely successful in reaching the goal of traffic congestion relief and transportation improvements as evidenced by overwhelming voter approval of a 40-year extension of the TransNet program that began in April 2008. It is estimated that over the duration of the 40-year extension, TransNet will provide \$14 billion in transportation improvements throughout the region. The City's share of TransNet revenue is based on population and the number of local street and road miles maintained. Through a cooperative effort with the San Diego Association of Governments (SANDAG), the City of San Diego is able to manage the Fund so that the most pressing transportation problems are addressed in accordance with TransNet goals.

The purpose of TransNet is to fund essential transportation improvements that relieve traffic congestion, increase safety, and improve air quality. These improvements include performing repairs, restoring existing roadways, and constructing assets within the public rights-of-way.

The TransNet revenues are primarily allocated to Engineering and Capital Projects for transportation/drainage design, bridge earthquake restrainers, and traffic engineering. In addition, the General Services Department receives funding for street maintenance services. The City Comptroller Department and the Engineering and Capital Projects Department are reimbursed for administrative oversight of the Fund.

Department Summary

TransNet
